

Muhammed Sahal KS

Azure Platform Engineer — Cloud Infrastructure — DevSecOps

muhammedsahalks@gmail.com | +91 6282543376 | LinkedIn | GitHub

Results-driven Azure Platform Engineer specializing in designing, securing, and maintaining scalable cloud infrastructure for AI and ML workloads. Expert in Azure DevOps, Infrastructure as Code (Terraform), and strict data governance. Proven ability to implement comprehensive CI/CD pipelines, enforce Entra ID RBAC controls, and ensure compliance with GxP requirements in regulated environments. Highly proactive with strong attention to detail, optimizing cloud costs while delivering resilient Azure architecture.

TECHNICAL SKILLS

Azure Ecosystem:	Azure AI Foundry, Azure OpenAI Service, AKS, Azure AI Search, Azure Cost Management
DevOps & IaC:	Azure DevOps, Terraform, Kubernetes, Docker, GitHub Actions, GitLab CI/CD, CI/CD Pipelines
Security & Identity:	Azure Entra ID, RBAC, GxP Compliance, Audit Logging, Private Endpoints, Azure Key Vault
Integrations & Tools:	Agent 365, SharePoint/ERP Integrations, Log Analytics, Azure Monitor, Python, Bash

EXPERIENCE

Azure Platform Engineer

Calicut, India | Feb 2026 – Present

ZyroSoft

- Architected Azure AI infrastructure utilizing Terraform to provision and manage Azure OpenAI Service, Azure AI Foundry, and AKS for enterprise ML workloads.
- Enforced strict GxP compliance and data governance by managing identity access controls via Azure Entra ID, implementing fine-grained RBAC, and standardizing comprehensive audit logging across all environments.
- Optimized monthly cloud expenditures by 25% by configuring proactive cost controls, billing alerts, and security guardrails within Azure Cost Management.
- Streamlined AI model updates and deployment by building resilient Azure DevOps CI/CD pipelines, supporting Agent 365 management protocols and deep integrations with enterprise applications (SharePoint, ERP).
- Authored detailed runbooks and SOPs to guarantee platform operability, contributing directly to validation documentation required for highly regulated pharmaceutical industry standards.

DevSecOps Engineer Trainee

Pune, India | Sep 2025 – Jan 2026

HeapTrace Technology

- Architected highly available cloud infrastructure resolving 30+ critical vulnerabilities by applying proactive security methodologies and Shift-Left principles to containerized workloads.
- Secured software supply chains by engineering CI/CD pipelines integrated with continuous container scanning, secret detection, and automated threat assessment tools.
- Improved cloud security posture by configuring robust IAM least-privilege policies, strict VPC/VNet segmentation, and centralized monitoring dashboards.

DevOps Engineer Intern

Kerala, India | Sep 2024 – Feb 2025

MaxFuture BridgeSkill LLP

- Accelerated secure release deployment speed by 30% by developing and maintaining automated CI/CD pipelines for application delivery and testing methodologies.
- Standardized secure cloud provisioning across development environments by designing reusable Infrastructure as Code (IaC) templates utilizing Terraform.

PROJECTS

GxP-Compliant Azure AI Platform & Enterprise Integration

- Designed a secure, scalable foundation for AI workloads leveraging Azure OpenAI and Azure AI Search deployed within AKS.
- Leveraged Agent 365 capabilities to establish secure AI Agent management protocols, seamlessly integrating AI models with customer enterprise applications including ERP and SharePoint systems.
- Secured data pipelines utilizing Azure Private Link and Entra ID RBAC, ensuring zero public internet exposure to satisfy strict pharmaceutical regulatory (GxP) data privacy requirements.

Azure Platform Governance & Cost Optimization Automation

- Implemented aggressive cost-control guardrails via Azure Cost Management, defining threshold limits that automatically escalated budgetary anomalies and optimized API token consumption.
- Configured centralized audit logging across all AI services using Log Analytics Workspace, ensuring complete infrastructure traceability and supporting long-term compliance audits.
- Engineered robust Azure DevOps CI/CD pipelines to automate AI agent deployment and model updates, reducing environment provisioning time by 60% through Terraform IaC.

EDUCATION

PG-DITISS (GPA: 8.0) Centre for Development of Advanced Computing (CDAC), Pune, India	2025
B.Tech in Information Technology (GPA: 6.37) College of Engineering Vadakara, Kerala, India	2024
